REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims **1-14** are allowable over the prior art of record because the prior art does not teach or suggest a method of reacting carboxylic acids comprising the steps of using and providing as presently claimed, esp. wherein said reaction takes place in the liquid in the channel and spaced from the electrodes.

Claims **15-27** are allowable over the prior art of record because the prior art does not teach or suggest a method of reacting carboxylic acids comprising the steps of providing and applying as presently claimed, esp., the step of applying an electrical voltage to cause electro-osmotic movement of the liquid along the channel.

The prior art does not contain any language that teaches or suggests the above. *Meresz et al.* do not teach wherein said reaction takes place in a liquid in a channel and spaced from the electrodes and *Haswell et al.* do not teach reacting carboxylic acids. One of ordinary skill in the art would not have considered that a charged channel could substitute for an anode in a carboxylic acid reaction. Therefore, a person skilled in the art would not have been motivated to adopt the above conditions, and a prima facie case of obviousness cannot be established.

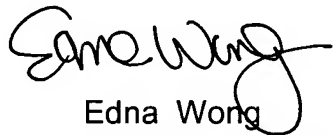

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
